DETAILED ACTION

Allowable Subject Matter

Claims 1-4,6-20 and 22 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art either taken singularly or in combination fails to disclose a condenser that has a tube and wire member forming into a spiral shape; one end of the flow passage is closed such that air flow is drawn substantially perpendicular to the tube and wire member. Reference to Hancock'269 discloses a spiraled tube fin member, and reference to McTurk' 448 discloses the fin member is wire. However, the combination device does not disclose the limitation that the flow passage is closed so that air flow is drawn substantially perpendicular to the tube and wire member. Specifically, Turk's wire fin members extend perpendicular to the tube and air that flows across the tube, would flow along the wire member to enter the flow passage in the combination device.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
